This Privacy Policy explains how Velank AI ("we", "us", or "our") collects, uses, stores, and protects your personal information when you use our platform and services. By accessing or using Velank AI, you agree to the practices described in this policy.

This policy complies with the Information Technology Act, 2000, the Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011, and is aligned with emerging obligations under India's Digital Personal Data Protection Act, 2023 (DPDPA).

1. Information We Collect

When you register for Velank AI, we collect:

- Name and email address
- Profile information you provide (role, industry, preferences)
- Authentication data from Google OAuth (see Section 2)
- Subscription and billing information (processed via third-party payment providers)

1.2 Content and Knowledge Base Data

To power our core service, we process documents and files you upload, including:

- PDFs, DOCX files, presentations, and notes you upload to your knowledge base
- Text content, links, and other materials you provide for post generation
- Generated LinkedIn posts, drafts, and content history

Note: We are currently evaluating our data retention model. Documents you upload may be processed in real-time and/or temporarily stored to enable our service. We will update this policy with specific retention periods once our architecture is finalised. We will never use your uploaded documents to train AI models or share them with other users.

1.3 Usage Data

We automatically collect certain technical data when you use our platform:

- IP address and approximate location (country/city level)
- Browser type, operating system, and device identifiers
- Pages visited, features used, and session duration
- Referring URLs and click-through data

1.4 LinkedIn Integration Data

When you connect your LinkedIn account, we access only the permissions you explicitly grant, which may include:

- Your LinkedIn profile information (name, headline, profile picture)
- Ability to create and schedule posts on your behalf

We do not access your LinkedIn messages, connections list, or any data beyond what is necessary for post scheduling and publishing.

2. Google OAuth — How We Use It

Velank AI uses Google OAuth 2.0 to allow you to sign in securely using your Google account. Here is exactly how this works and what it means for your data:

2.1 What We Request from Google

When you sign in with Google, we request the following scopes:

- Email address — to identify your account and send service communications
- Name and profile picture — to personalise your dashboard experience

We do not request access to your Google Drive, Gmail, Calendar, Docs, or any other Google services unless you explicitly enable those integrations within the platform.

2.2 What We Do With Google Data

- We use your Google email as your account identifier
- We store your name and email in our database to maintain your account
- We do not sell, share, or transfer your Google account data to any third party
- We do not use Google account data for advertising or profiling purposes

2.3 Google API Services User Data Policy

Velank AI's use and transfer of information received from Google APIs to any other app adheres to the Google API Services User Data Policy, including the Limited Use requirements. Specifically:

- We only use Google user data to provide and improve features described in this policy
- We do not use Google user data to serve advertisements
- We do not allow humans to read your Google data unless you have given explicit permission, or it is necessary for security purposes, or required by law
- We do not transfer Google user data to third parties except as necessary to provide our service

2.4 Revoking Google Access

You can revoke Velank AI's access to your Google account at any time by visiting your Google Account Security settings at myaccount.google.com/permissions. Revoking access will log you out of Velank AI but will not delete your account or data — you can request deletion separately (see Section 7).

3. How We Use Your Information

We use the information we collect for the following purposes:

- To create and manage your account
- To generate LinkedIn content from your uploaded knowledge base
- To schedule and publish posts to LinkedIn on your behalf
- To provide customer support and respond to your queries
- To send service-related notifications (account activity, billing, product updates)
- To improve our platform, fix bugs, and develop new features
- To detect and prevent fraud, abuse, or security threats
- To comply with legal obligations

We do not use your data to train AI models. We do not sell your personal data. We do not use your uploaded documents to generate content for other users.

4. Data Sharing and Disclosure

4.1 Third-Party Service Providers

We share data with trusted third-party providers only to the extent necessary to operate our service:

- AI model providers (e.g. OpenAI, Anthropic, Google) — to process prompts and generate content. Only the content of your prompt and relevant knowledge base extracts are sent. Your personal account information is not shared.
- Payment processors (e.g. Razorpay, Stripe) — to handle subscription billing. We do not store payment card details.
- Cloud infrastructure providers — to host and store data securely.
- Analytics tools — to understand platform usage patterns using anonymised or aggregated data.

4.2 Legal Requirements

We may disclose your information if required to do so by law, court order, or government authority, or to protect the rights, property, or safety of Velank AI, our users, or the public.

4.3 Business Transfers

In the event of a merger, acquisition, or sale of all or substantially all of our assets, your data may be transferred as part of that transaction. We will notify you via email or a prominent notice on our platform before your data is transferred and becomes subject to a different privacy policy.

5. Data Security

We implement industry-standard technical and organisational measures to protect your personal data, including:

- Encryption of data in transit (TLS/HTTPS)
- Encryption of sensitive data at rest

- Access controls limiting data access to authorised personnel only
- Regular security reviews and vulnerability assessments

No method of transmission over the internet is 100% secure. While we take reasonable steps to protect your data, we cannot guarantee absolute security. If we become aware of a data breach that affects your personal information, we will notify you as required by applicable law.

6. Data Retention

We retain your personal data for as long as your account is active or as needed to provide our services. Specifically:

- Account data: Retained until you delete your account
- Uploaded documents: Currently retained to enable the knowledge base feature. We are developing granular controls to allow you to delete individual files at any time.
- Generated posts and drafts: Retained in your account history until you delete them or close your account
- Usage and log data: Retained for up to 90 days for security and debugging purposes

When you delete your account, we will delete or anonymise your personal data within 30 days, except where retention is required by law.

7. Your Rights
