

CRYPTO EXCHANGE SATOSHI

Centralized Exchange — Internal Knowledge Base
Content Reference Document for AI-Powered LinkedIn Content Engine

Compiled: Q1 2025 | Confidential — Internal Use Only

1. COMPANY OVERVIEW

1.1 Company Profile

Company Name: Crypto Exchange Satoshi (CES)

Founded: 2019, incorporated in Dubai, UAE with regional offices in Singapore, Mumbai, and Istanbul.

Headquarters: Dubai International Financial Centre (DIFC), Dubai, UAE

Legal Entity: Satoshi Exchange FZE

Regulatory Licenses: VARA (Virtual Asset Regulatory Authority, Dubai), MAS (Monetary Authority of Singapore) — Major Payment Institution License, FSCA (South Africa) — CASP Registration

Exchange Type: Centralized Exchange (CEX) with hybrid liquidity infrastructure

Core Business: Spot trading, derivatives (perpetual futures), crypto-to-fiat on/off ramp, institutional OTC desk, staking, and crypto lending.

Website: www.satoshiexchange.io

App Downloads (cumulative as of Dec 2024): 4.7 million across iOS and Android

Employee Count: 312 full-time employees globally as of Q4 2024

1.2 Mission and Vision

Mission: To make crypto trading accessible, secure, and profitable for everyone — from first-time retail investors to institutional desks managing billions.

Vision: To become the most trusted centralized exchange in the emerging markets of South Asia, Middle East, and Africa (MEASA) by 2027.

Core Values: Security-first infrastructure, radical transparency, user-centric product design, regulatory compliance as a competitive advantage, and relentless innovation.

1.3 Founding Story

Crypto Exchange Satoshi was founded in 2019 by a team of three co-founders: Aryan Mehta (CEO, ex-Goldman Sachs FX desk), Priya Nair (CTO, ex-Coinbase infrastructure engineer), and Daniel Osei (COO, ex-Binance regional operations MENA). The exchange launched its beta in November 2020 with 12 trading

pairs and grew to 380+ trading pairs by end of 2024. The founding thesis was simple: existing global exchanges were not built for the regulatory nuances, payment infrastructure realities, and user behavior of emerging markets. CES built its stack natively for these markets, supporting local payment methods like UPI (India), NEFT, PayFast (South Africa), and regional bank wires across the GCC.

2. FINANCIAL PERFORMANCE

2.1 Annual Revenue — FY 2024

Revenue Stream	FY 2023 (USD)	FY 2024 (USD)	YoY Growth
Spot Trading Fees	\$18,400,000	\$28,700,000	+56%
Derivatives / Futures Fees	\$9,200,000	\$16,400,000	+78%
OTC Institutional Desk	\$6,100,000	\$9,800,000	+61%
Staking & Yield Products	\$3,400,000	\$5,900,000	+73%
Fiat On/Off Ramp Fees	\$2,800,000	\$4,600,000	+64%
Listing Fees (Project Tokens)	\$1,200,000	\$2,100,000	+75%
API & Data Subscription	\$640,000	\$1,140,000	+78%
TOTAL REVENUE	\$41,740,000	\$68,640,000	+64.4%

Note: Revenue figures are gross trading fee income before operational expense deductions. FY 2024 marked the first year CES crossed the \$60M revenue milestone.

2.2 Profitability — FY 2024

Total Revenue FY 2024: \$68,640,000

Total Operating Expenses FY 2024: \$41,180,000

- Staff & HR (salaries, benefits, ESOPs): \$16,400,000
- Technology Infrastructure (AWS, colocation, security audits): \$8,700,000
- Regulatory, Legal & Compliance: \$4,200,000
- Marketing & User Acquisition: \$6,900,000
- Liquidity Provision & Market Making Cost: \$3,200,000
- G&A; and Misc: \$1,780,000

EBITDA FY 2024: \$27,460,000

Net Profit FY 2024 (after taxes and depreciation): \$21,380,000

Net Profit Margin FY 2024: 31.1%

Net Profit FY 2023 (for comparison): \$11,200,000

YoY Net Profit Growth: +90.9%

2.3 Quarterly Revenue Breakdown — FY 2024

Quarter	Revenue (USD)	Net Profit (USD)	Active Users	Trade Volume
Q1 2024 (Jan–Mar)	\$13,200,000	\$3,900,000	610,000	\$2.8B
Q2 2024 (Apr–Jun)	\$15,400,000	\$4,700,000	680,000	\$3.3B
Q3 2024 (Jul–Sep)	\$17,800,000	\$5,900,000	780,000	\$4.1B
Q4 2024 (Oct–Dec)	\$22,240,000	\$6,880,000	940,000	\$5.6B
FULL YEAR	\$68,640,000	\$21,380,000	940,000 (peak)	\$15.8B

Q4 2024 was the strongest quarter in CES's history. Net profit crossed \$6.88M in a single quarter — marking the first time a quarterly profit exceeded the \$6M threshold. The Q4 marketing campaign 'Trade Without Borders' drove a 20.5% surge in new user registrations.

2.4 Last Quarter Highlights — Q4 2024 (Most Recent Completed Quarter)

Quarter: October 1, 2024 – December 31, 2024

Revenue: \$22,240,000 (record quarter)

Net Profit: \$6,880,000 — crossed \$6M quarterly profit milestone for first time

Total Spot Volume: \$3.9B

Total Derivatives Volume: \$1.7B

New User Registrations: 198,000 (highest ever in a single quarter)

KYC Completion Rate: 71.3% of new sign-ups (up from 64% in Q3)

Average Fee per Active User: \$23.7

Top Performing Pairs: BTC/USDT, ETH/USDT, SOL/USDT, SATX/USDT (proprietary token), DOGE/USDT

Institutional OTC Desk Volume: \$480M (up 34% from Q3)

Staking TVL (Total Value Locked): \$312M across 14 supported assets

Uptime: 99.97% — zero major outages in Q4 2024

Customer Support CSAT Score: 4.4/5.0 (target was 4.2)

2.5 Revenue During Market Liquidity Drop (Mid-2024)

Context: Between March and June 2024, global crypto market experienced a 28% drop in total market liquidity. Average daily trading volumes on top CEXes fell by 19–35%. Bitcoin price dipped from \$71,400 (March high) to \$56,200 (May low).

CES Strategy: CES deployed a counter-cyclical revenue strategy that protected and grew revenue despite the market-wide slowdown.

Key Actions Taken During the Liquidity Drop:

- Derivatives Push: CES accelerated the rollout of perpetual futures with 20x leverage, launching 18 new derivative pairs in Q2. Derivatives revenue grew 78% YoY, partially compensating for compressed spot volumes.
- Staking Promotion: Launched 'Earn While You Wait' campaign that pushed staking signups by 41% in Q2. Staking revenue became a defensive buffer — not tied to trading activity.

3. Institutional OTC Desk: Signed 6 new institutional clients during the bear phase. Institutional desks often increase OTC activity during volatile/illiquid phases to manage exposure discreetly.
4. Fiat On-Ramp Expansion: Integrated 3 new local payment rails in India and South Africa. Net fiat gateway volume grew 22% quarter-over-quarter despite spot slowdown.
5. Token Listing Revenue: Greenlit 4 new project token listings in Q2 at negotiated listing fees totaling \$840,000.
- Result: Despite the liquidity drop, Q2 2024 revenue was \$15.4M — still 12% higher than Q2 2023's \$13.75M. CES did not report a quarterly revenue decline at any point in FY 2024.

3. USER GROWTH AND ACQUISITION

3.1 User Base Metrics

Metric	Dec 2022	Dec 2023	Dec 2024
Registered Users	820,000	1,640,000	3,280,000
KYC-Verified Users	490,000	1,060,000	2,140,000
Monthly Active Users (MAU)	210,000	390,000	720,000
Daily Active Users (DAU)	44,000	88,000	186,000
Mobile App Users (Active)	128,000	260,000	510,000
Institutional Accounts	140	310	620
API Trading Users	2,200	5,800	11,400

3.2 User Acquisition by Geography — FY 2024

- India: 38% of new user registrations (largest single market). UPI integration and Hindi/Tamil language support were key drivers.
- UAE & GCC: 22% of new registrations. CES's VARA license is a strong trust signal in this market.
- South Africa & Sub-Saharan Africa: 16% of new registrations. PayFast integration + ZAR trading pairs.
- Turkey & Eastern Europe: 11% of new registrations. High inflation markets with strong crypto adoption.
- Southeast Asia (ex-Singapore): 8% of new registrations.
- Rest of World: 5%.

3.3 Major Marketing Campaigns FY 2024

Campaign 1: 'Trade Without Borders' (Q4 2024)

Duration: October 1 – December 20, 2024

Budget: \$2,100,000

Channels: YouTube pre-rolls (India/UAE), Google UAC, Meta (Facebook/Instagram), Twitter/X promoted posts, influencer partnerships (12 crypto creators with combined reach of 8.4M followers), LinkedIn B2B ads targeting finance professionals.

Offer: Zero spot trading fees for first 30 days for new KYC-verified users + \$15 welcome bonus on first \$500 deposit.

Results: 198,000 new registrations in Q4. 71.3% KYC completion. CAC (Customer Acquisition Cost): \$10.60 per KYC-verified user. LTV:CAC ratio estimated at 14:1 based on Q4 cohort behavior. ROAS: 4.2x within 90 days.

Campaign 2: 'Earn While You Wait' — Staking Push (Q2 2024)

Duration: April 15 – June 30, 2024

Budget: \$780,000

Context: Launched during market liquidity drop to retain users who might otherwise go inactive.

Channels: In-app push notifications, email drip (3-part sequence), YouTube educational shorts, Telegram community campaign.

Offer: Boosted staking APY for 60 days (ETH staking at 6.2% vs standard 4.8%, SOL at 9.1% vs 7.4%).

Results: 41% spike in staking sign-ups. Staking TVL grew from \$180M to \$248M during campaign window. User churn in Q2 was 8.2% vs industry benchmark of 14.6% during comparable bear phases.

Campaign 3: 'Satoshi Pro' Institutional Outreach (Q3 2024)

Duration: July – September 2024

Budget: \$420,000

Channels: LinkedIn sponsored content, direct outreach via BD team, attendance at TOKEN2049 Singapore and GITEX Dubai, white-glove onboarding program.

Results: 6 new institutional accounts onboarded. Average institutional AUM per client: \$14.2M. Total institutional volume added from this cohort in first 90 days: \$127M.

Campaign 4: 'Satoshi Referral League' — Viral Referral Program (Year-round 2024)

Duration: January 1 – December 31, 2024 (tiered refresh every quarter)

Mechanics: Referrer earns 20% of referee's trading fee income for 12 months. Top 100 referrers on a public leaderboard. Bonus milestones: 5 referrals (\$25 bonus), 25 referrals (\$200 bonus + CES Merchandise), 100 referrals (\$1,500 + VIP tier upgrade).

Results: 340,000 users (out of 3.28M total registered) came via referral in 2024. Referral CAC: \$3.40 — lowest of any channel. Referred users showed 2.3x higher 90-day retention vs paid acquisition users. Total referral-driven revenue attributed: \$9.2M.

3.4 User Retention Data

30-Day Retention (FY 2024 average): 61% of new KYC users made at least one trade within 30 days of signup.

90-Day Retention: 44% still active (defined as at least 2 logins and 1 trade) at day 90.

180-Day Retention: 31%.

Churn Rate (Monthly, Active Users): 6.8% average across FY 2024.

Reactivation Rate: 18% of dormant users reactivated within 6 months (driven by price alerts and promotional emails).

4. PRODUCT AND TECHNOLOGY

4.1 Core Product Suite

Spot Trading: 380+ trading pairs. Maker fee: 0.08%, Taker fee: 0.10% (retail standard). VIP discounts for high-volume traders with up to 70% fee reduction at VIP 10 tier. Order types: Market, Limit, Stop-Limit, OCO (One-Cancels-Other), Trailing Stop.

Derivatives — Perpetual Futures: 42 perpetual pairs as of Dec 2024. Leverage: up to 50x (BTC/ETH), up to 20x (altcoins). Insurance fund size: \$12.4M. Funding rate mechanism: 8-hourly. ADL (Auto-Deleveraging) system in place.

CES Earn (Staking & Yield): Simple staking (14 assets), DeFi yield vaults (8 strategies), fixed-term deposits (7, 14, 30, 90 day tenures), dual-asset investment products. TVL as of Dec 2024: \$312M.

OTC Desk (Satoshi Pro): Minimum trade size: \$50,000. Dedicated relationship manager. 24/7 quote desk. Supported assets: BTC, ETH, SOL, BNB, XRP, USDT, USDC and 14 others. RFQ system integrated.

Fiat On/Off Ramp: Supported fiat currencies: INR, AED, ZAR, TRY, SGD, USD, EUR, GBP. Payment methods: UPI, NEFT/IMPS, bank wire, PayFast, card (Visa/Mastercard). Average fiat processing time: 12 minutes for on-ramp (INR via UPI: under 3 minutes).

CES Launchpad: IEO/IDO platform for new token projects. 14 projects launched via Launchpad in 2024. Average ROI for Launchpad participants at listing date: 2.8x. Total value raised via Launchpad in 2024: \$34M.

SATX Token (Native Exchange Token): Utility: fee discounts (up to 25%), Launchpad allocation boosts, staking rewards, governance voting. Circulating supply: 400M SATX. Total supply: 1B SATX. Token buy-back-and-burn program: \$2.4M worth burned in 2024.

4.2 Technology Infrastructure

Matching Engine: Proprietary high-performance matching engine built in Rust. Throughput: 1.2 million orders per second. Latency: sub-1ms for order matching under normal load.

Cloud Infrastructure: Multi-cloud (AWS primary, GCP failover). Data centers: Singapore (primary), Frankfurt (EU), Mumbai (India edge). CDN: Cloudflare Enterprise.

Security Architecture: 95% of user funds in cold storage. Multi-party computation (MPC) wallets for hot wallet management. Hardware security modules (HSMs) for key management. Real-time AML/transaction monitoring via Chainalysis. Penetration testing: quarterly (external) + continuous (internal red team).

Bug Bounty Program: Active since 2022. \$1.2M paid out in bug bounties to date. Maximum bounty: \$100,000 for critical vulnerabilities.

Uptime SLA: 99.95% commitment. Actual uptime FY 2024: 99.97%.

Mobile Apps: iOS (App Store rating: 4.6/5, 48,000 ratings) and Android (Play Store rating: 4.4/5, 92,000 ratings). App redesign launched in September 2024 reduced onboarding drop-off by 34%.

API: REST and WebSocket APIs. FIX API for institutional users. Rate limits: 1,200 requests/minute (standard), 6,000/min (VIP). API documentation: 98% developer satisfaction score in last external survey.

4.3 Product Milestones FY 2024

January 2024: Launched Copy Trading feature — 11,200 users active as copy traders within 60 days.

February 2024: Integrated UPI 2.0 for INR deposits — reduced fiat deposit failure rate from 9% to 1.4%.

April 2024: Launched 'CES Earn' unified yield dashboard — staking TVL grew 28% in 30 days post-launch.

June 2024: Released TradingView integration natively into the web platform. Chart analysis time per user increased 40%.

August 2024: Launched Satoshi Pro (institutional OTC dashboard) with RFQ system and multi-sig treasury management for institutional clients.

September 2024: Full app redesign. Onboarding drop-off reduced 34%. App Store reviews improved from 4.3 to 4.6.

October 2024: Launched AI-powered portfolio insights feature (beta) — personalized trade analytics, PnL breakdown, fee efficiency score.

November 2024: Launched Satoshi Launchpad 2.0 with on-chain vesting transparency and KYC-gated allocation system.

December 2024: Hit 3M+ registered users milestone. Internal celebration event held across all offices.

5. OPERATIONS AND COMPLIANCE

5.1 Regulatory Status

UAE (Primary): VARA (Virtual Asset Regulatory Authority) — Full VASP License obtained March 2023. CES was among the first 8 exchanges globally to receive a full VARA license. Regular monthly reporting to VARA. AML/CFT framework audited annually.

Singapore: MAS Major Payment Institution (MPI) License — obtained January 2024. Enables fiat-to-crypto services for Singaporean users.

South Africa: FSCA Crypto Asset Service Provider (CASP) registration — obtained August 2024.

India: CES operates as a reporting entity under the PMLA (Prevention of Money Laundering Act) framework and is registered with the FIU-IND (Financial Intelligence Unit India) since November 2023.

Turkey: Registered with MASAK (Financial Crimes Investigation Board) for AML compliance — September 2024.

Pending: CES is actively pursuing licensing in Bahrain (CBB), Kenya (CMA), and Nigeria (SEC).

5.2 Compliance Infrastructure

KYC Provider: Jumio (primary) + Onfido (secondary/failover). Average KYC approval time: 4.2 minutes.

AML Monitoring: Chainalysis Reactor + in-house rule engine. Real-time transaction screening. 99.3% SAR (Suspicious Activity Report) response rate within mandated timeframes.

Travel Rule Compliance: Integrated with Notabene for FATF Travel Rule compliance across 14 counterparty exchanges.

Compliance Team Size: 18 full-time compliance professionals including 3 senior AML officers and 1 Chief Compliance Officer (Yasmin Al-Rashidi, ex-HSBC GCC).

Regulatory Fines FY 2024: Zero. CES has never received a material regulatory fine or enforcement action.

5.3 Risk Management

Market Risk: Real-time position monitoring. Circuit breakers on extreme price moves (>15% in 15 min triggers temporary halt + review).

Counterparty Risk: All institutional OTC settlements use DVP (Delivery vs Payment) protocols where possible. 100% pre-funded model for retail.

Liquidity Risk: \$48M in reserve liquidity maintained in stablecoins (USDT, USDC) and BTC. Liquidity stress testing quarterly.

Operational Risk: BCP (Business Continuity Plan) tested bi-annually. RPO: 15 minutes. RTO: 30 minutes. Geographic redundancy across 3 data center regions.

Insurance: \$80M in digital asset insurance coverage via Lloyd's of London syndicate (covers cold storage theft, physical security breach, and insider fraud).

6. TRADING DATA AND MARKET POSITION

6.1 Trading Volume History

Period	Spot Volume	Derivatives Volume	Total Volume
FY 2022	\$3.8B	\$0.9B	\$4.7B
FY 2023	\$7.2B	\$2.8B	\$10.0B
FY 2024	\$11.4B	\$4.4B	\$15.8B
Q4 2024 alone	\$3.9B	\$1.7B	\$5.6B

6.2 Market Position

CoinGecko Ranking (by 24h adjusted volume, Dec 2024): #31 globally.

CMC Trust Score: 9/10 (one of only 12 exchanges globally with a score of 9 or higher as of Dec 2024).

Emerging Markets Ranking: #3 in MEASA region by adjusted trading volume.

Competitive Set: CES considers its direct competitors to be CoinDCX (India), Rain (GCC), and VALR (South Africa) at a regional level, with Binance, OKX, and Bybit as global tier benchmarks.

Market Share (India CEX spot, Dec 2024): ~8.4% by INR volume.

Market Share (GCC CEX spot, Dec 2024): ~11.2% by USD volume.

6.3 Most Traded Assets FY 2024

Top 10 Spot Pairs by Volume: 1. BTC/USDT (34%), 2. ETH/USDT (21%), 3. SOL/USDT (9%), 4. BNB/USDT (6%), 5. XRP/USDT (5%), 6. SATX/USDT (3.8%), 7. DOGE/USDT (3.4%), 8. MATIC/USDT (2.9%), 9. ADA/USDT (2.4%), 10. AVAX/USDT (2.1%).

Top 5 Perpetual Pairs by OI: 1. BTC-PERP, 2. ETH-PERP, 3. SOL-PERP, 4. BNB-PERP, 5. DOGE-PERP.

7. TEAM, CULTURE, AND PEOPLE

7.1 Leadership Team

Aryan Mehta — CEO and Co-Founder: 14 years in financial markets. Ex-Goldman Sachs FX derivatives desk (London). MBA from London Business School. Based in Dubai. Focus: Strategy, investor relations, regulatory relationships.

Priya Nair — CTO and Co-Founder: Ex-Coinbase (infrastructure lead, 2016–2018), ex-Ripple (protocol engineer). Masters in Computer Science, IIT Bombay. Based in Singapore. Focus: Platform reliability, security, and product engineering.

Daniel Osei — COO and Co-Founder: Ex-Binance MENA regional operations director. MBA from INSEAD. Based in Dubai. Focus: Operations, compliance, and business development.

Yasmin Al-Rashidi — Chief Compliance Officer: Ex-HSBC GCC AML director. CAMS certified. 18 years in financial crime compliance. Based in Dubai.

Rohan Kapoor — Head of Product: Ex-Paytm Money (product lead, investments). Previously at CoinSwitch Kuber. IIT Delhi + ISB alumni. Based in Mumbai/Dubai. Focus: User experience, product roadmap, feature prioritization, growth product.

Fatima Al-Zaabi — VP Marketing: Ex-Souq.com (Amazon MENA), formerly at Careem. 12 years in digital marketing across MENA. Based in Dubai.

James Okello — Head of Business Development (Africa): Previously at BitPesa. Nairobi-based. Driving CES's Sub-Saharan Africa expansion.

Kavya Sharma — Head of Data and Analytics: Ex-Zerodha data team. Built CES's trading analytics infrastructure from scratch. Based in Bangalore.

7.2 Team Metrics

Total FTE: 312 (as of December 2024)

Engineering & Product: 128 employees (41% of total workforce)

Operations & Compliance: 54 employees

Marketing & Growth: 38 employees

Business Development & Sales: 32 employees

Customer Support: 44 employees (24/7 multilingual: English, Hindi, Arabic, Turkish)

Finance & Legal: 16 employees

Offices: Dubai (HQ, 110 staff), Singapore (62 staff), Mumbai (84 staff), Istanbul (36 staff), Nairobi (20 staff — Africa expansion hub)

Hiring Plan 2025: 80+ new hires planned. Key roles: Senior backend engineers (Rust/Go), compliance officers for Bahrain and Nigeria markets, product managers for mobile, and institutional BD leads.

Employee NPS (eNPS): +42 (Dec 2024 survey). Industry benchmark for fintech: +28.

Gender Diversity: 38% female across workforce; 33% at leadership level (director and above).

7.3 Company Culture

CES operates as a remote-first company with quarterly all-hands events held in Dubai. Core cultural pillars: ownership mentality, builder's mindset, radical transparency, and customer obsession. Engineering teams use 2-week sprint cycles with bi-weekly product demo days. All-hands meeting cadence: Monthly (virtual) + Quarterly (in-person, Dubai).

ESOP Pool: 8% of total equity reserved for employee stock options. 180 employees have active ESOP grants. Cliff: 1 year. Vesting: 4 years monthly post-cliff.

Learning & Development: \$1,200 annual L&D; budget per employee. Internal 'Satoshi Academy' with 24 courses on crypto fundamentals, compliance, and product skills.

8. GROWTH STRATEGY AND 2025 ROADMAP

8.1 Strategic Priorities for 2025

Priority 1 — Geographic Expansion: Launch in Bahrain (CBB license in process), Nigeria (SEC registration), and Kenya (CMA application filed). Target: 5 new licensed markets by end of 2025.

Priority 2 — Institutional Growth: Grow institutional AUM from \$1.4B to \$3.5B by Dec 2025. Hire 4 dedicated institutional sales managers in London, Singapore, Dubai, and New York.

Priority 3 — Product Depth: Launch Options trading (Q2 2025), Margin Lending (Q3 2025), and NFT marketplace integrated within CES app (Q4 2025).

Priority 4 — Revenue Diversification: Reduce dependency on spot trading fees to below 35% of total revenue by Dec 2025 (currently 41.8%). Grow derivatives, staking, and B2B API revenue.

Priority 5 — User Quality over Quantity: Shift KPI emphasis from registered users to 90-day retained active users. Target 90-day retention to 52% by end of 2025.

8.2 Revenue Target FY 2025

Total Revenue Target: \$105,000,000 (53% growth over FY 2024)

Net Profit Target: \$34,000,000 (59% growth over FY 2024)

Quarterly Net Profit Milestone: \$10M quarterly profit target for Q4 2025.

Monthly Active Users Target: 1,200,000 (vs 720,000 in Dec 2024)

Total Trading Volume Target: \$28B (vs \$15.8B in FY 2024)

8.3 Product Roadmap 2025 (Highlights)

Q1 2025: Launch of 'CES Wallet' — self-custodial Web3 wallet integrated within the CES app ecosystem. Cross-chain support (EVM, Solana, Cosmos).

Q1 2025: Enhanced AI portfolio insights — move from beta to full production. Add AI-generated trade alerts and personalized market commentary.

Q2 2025: Options trading — European-style vanilla options on BTC and ETH. Target: \$200M OI within 90 days of launch.

Q2 2025: B2B white-label exchange solution — target neobanks and fintech apps in MEASA wanting to offer crypto to their users via CES infrastructure.

Q3 2025: Margin Lending — peer-to-pool lending model. Estimated \$80M in lending book by end of Q3.

Q3 2025: Launch Satoshi Academy as a public product — crypto education with CES-integrated learn-to-earn rewards.

Q4 2025: NFT Marketplace — curated marketplace integrated within the CES app. Focus on RWA (Real World Asset)-backed NFTs.

8.4 Funding and Investor Relations

Last Funding Round: Series B — \$42M raised in March 2023. Lead investor: Tiger Global. Participating: Multicoin Capital, Pantera Capital, Sequoia India.

Total Raised to Date: \$68M across Seed (\$4M, 2020), Series A (\$22M, 2021), and Series B (\$42M, 2023).

Post-Money Valuation (Series B): \$310M

Current Status: Profitable and cash-flow positive since Q2 2023. Not actively fundraising. Evaluating Series C or strategic partnership in H2 2025 to fuel geographic expansion.

Potential IPO: Board has discussed IPO readiness. Internal target: list on NASDAQ or Abu Dhabi Securities Exchange (ADX) by 2027. Big 4 audit (Deloitte) engaged since FY 2023.

9. CRYPTO INDUSTRY CONTEXT AND CES POSITIONING

9.1 Industry Trends Relevant to CES

Bitcoin ETF Impact: The approval of Bitcoin spot ETFs in the US (January 2024) increased institutional interest globally. CES OTC desk saw a 34% surge in institutional volume in Q1 2024 attributed partly to the ETF narrative driving institutional education and appetite in MEASA markets.

Regulatory Tailwinds: VARA in UAE, MiCA in Europe, and India's FIU registration framework have created regulatory clarity — benefiting licensed exchanges like CES over unregulated competitors. CES's compliance-first positioning is becoming a competitive moat, not just a cost center.

DEX vs CEX Dynamics: Despite DeFi growth, CEXes continue to dominate retail volume (estimated 85% of global crypto spot volume flows through CEXes as of 2024). CES believes CEXes will remain dominant in emerging markets due to fiat on-ramp dependency, customer support needs, and UX maturity requirements.

Market Cycle: CES's FY 2024 performance came during a recovery cycle (Bitcoin from \$42K in Jan 2024 to \$95K+ in Nov 2024). CES's diversified revenue model (staking, OTC, fiat ramp) was stress-tested during the mid-year liquidity dip and proved resilient.

AI in Crypto: CES is investing in AI-powered features — portfolio insights, AML anomaly detection, personalized market alerts — positioning as a tech-forward exchange, not just a trading venue.

Real World Assets (RWA): Tokenized RWAs are an emerging category. CES's Launchpad hosted 2 RWA-backed token projects in 2024. 2025 roadmap includes NFT marketplace with RWA focus.

9.2 Competitive Advantages

1. Regulatory Moat: Multi-jurisdictional licensing (VARA, MAS, FSCA, FIU-IND) — one of the most licensed CEXes targeting emerging markets globally.
2. Local Payment Rails: Native UPI, PayFast, GCC bank wire integrations — Binance and OKX still use generic payment processors in these markets.
3. Multilingual Support: Full product support in English, Hindi, Arabic, and Turkish — core to reducing friction in MEASA markets.
4. Institutional + Retail Hybrid: Satoshi Pro OTC desk sits alongside a retail-friendly app — capturing both segments on one platform.
5. Data and Personalization: First-party data from 3.28M users enables hyper-personalized product experiences and campaign targeting.
6. Trust and Transparency: Proof of Reserves published monthly (Merkle tree-based). Zero exchange hacks to date. \$80M insurance coverage publicly disclosed.

10. CUSTOMER EXPERIENCE AND SUPPORT

10.1 Support Infrastructure

Support Channels: Live chat (in-app and web), email ticket system, WhatsApp support (India and GCC), Telegram community moderation, phone support (VIP and institutional only).

Support Hours: 24/7/365. Average first response time (live chat): 2.1 minutes. Average resolution time: 18.4 hours.

Languages Supported: English, Hindi, Arabic, Turkish.

CSAT Score FY 2024: 4.4/5.0. Q4 2024 (post-app redesign): 4.6/5.0.

Support Team Size: 44 agents globally across 3 shifts.

AI Chatbot: Deployed in January 2024. Handles 61% of incoming queries without human escalation. Top resolved categories: KYC status, deposit tracking, withdrawal status, fee queries.

10.2 Community

Telegram: 340,000 members across regional groups (Global, India, Arabic, Turkey, Africa).

Discord: 88,000 members. Active trading discussion, product updates, AMA sessions.

Twitter/X: 210,000 followers. Content mix: market updates, product launches, AMA threads, regulatory news.

LinkedIn: 28,000 followers. Institutional and B2B focused content.

Reddit: r/SatoshiExchange — 42,000 members.

CES Blog: 120,000 monthly readers. Top content: market analysis, educational guides, product updates.

Satoshi Insider Program: 2,400 power users with early beta access, exclusive AMAs with leadership, and monthly product feedback calls with the product team.

10.3 Product-Led Community Initiatives

Satoshi Hackathon 2024: Annual developer hackathon. 2024 edition: 380 participants, 42 projects submitted. \$150,000 in prizes. Winning project (a DeFi bridge integration) was acquired by CES and integrated into the roadmap.

Satoshi University Partnership Program: MoUs with 7 universities in India, UAE, and South Africa. On-campus crypto education labs, internship placements, and student trading competitions.

Proof of Reserves AMA: Quarterly live AMA sessions where the CFO and CTO present and explain the monthly Proof of Reserves reports to the community.

11. KEY QUOTES AND LEADERSHIP NARRATIVES

Aryan Mehta (CEO): 'We built CES for markets that the incumbents forgot. When we designed our fiat rails for UPI and PayFast, we weren't doing it because it was easy — we did it because it was the right thing for our users. That decision alone drove 38% of our 2024 growth.'

Priya Nair (CTO): 'Our matching engine is faster than most exchanges three times our size. We have been obsessive about performance from day one. Sub-millisecond execution is not a feature — it is the baseline. Anything less is a broken promise to our traders.'

Daniel Osei (COO): 'Africa is the most underserved crypto market in the world and one of the fastest growing. We opened our Nairobi hub in 2024 not because it was the easiest thing to do, but because we believe this market will be transformational by 2030. CES wants to be the exchange that was there at the beginning.'

Rohan Kapoor (Head of Product): 'Every product decision at CES starts with the same question: does this make a first-time crypto user in Mumbai or Nairobi feel confident enough to press the buy button? If the answer is no, we go back to the drawing board. Our job is not to build features. Our job is to build trust.'

Yasmin Al-Rashidi (CCO): 'Compliance is the foundation, not the ceiling. CES's VARA license, our FIU registration in India, our MAS license in Singapore — these are not just checkboxes. They are our promise to users that when they put their money on our platform, there is a regulated, audited, accountable institution behind that promise.'

12. QUICK REFERENCE DATA POINTS

This section is a fast-lookup reference for all key metrics.

Metric	Value
Founded	2019
HQ	Dubai, UAE (DIFC)
Employees (Dec 2024)	312
Registered Users (Dec 2024)	3,280,000
KYC-Verified Users (Dec 2024)	2,140,000
Monthly Active Users (Dec 2024)	720,000
Total Revenue FY 2024	\$68,640,000
